4. Employment in Larger Private Factories, New South Wales

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 628 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Acting Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than particulars of total factory employment shown in Table 2.

46. Index of Value of Shares on Sydney Stock Exchange

The index relates to the value of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks), whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

52. Wholesale Price (Basic Materials and Foodstuffs) Index

Compiled by Commonwealth Statistician. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

From August, 1950, to 30th June, 1951, a bounty was paid on raw wool purchased for local manufacture. The effective price, that is the open market (auction room) price less bounty, has been used in calculating the index numbers in this table.
